

- 1.Explain what the information shows about the gig economy
- 2.What might be the wider implications of this?

Found **delivery or driving** work via an online platform

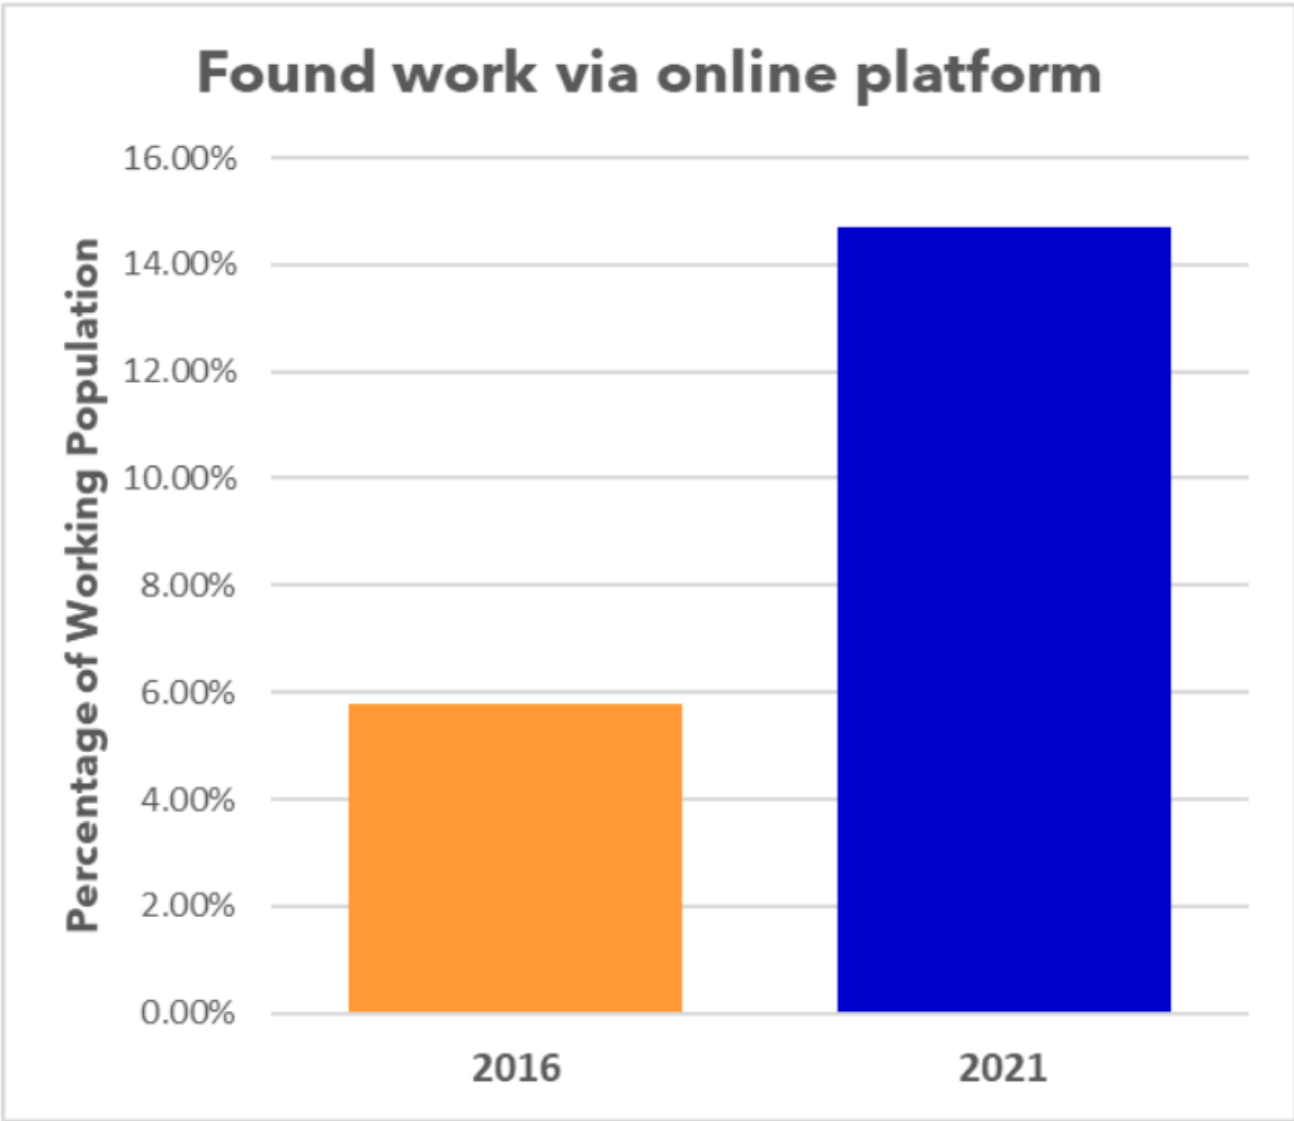

2016	2021
1.9%	8.9%

Table 1a

Found work doing **online tasks** via an online platform

2016	2021
4.9%	11.9%

Table 1b

Source 1: Use of online platforms to find work (TUC)

Found **errand running** work via an online platform

2016	2021
2.3%	6.2%

Table 1c

Found **household services** work via an online platform

2016	2021
3.2%	7.9%

Table 1d

Maths Moment

Assume that the figures in the graph are 6% in 2016 and 15% in 2021. If the working population stood at 30m and was unchanged between 2016 and 2021, what is the increase in the number of people who found work online between 2016 and 2021?
